Brands need brand-name pens

Dear friends, and partners of our company,

if you opt for a writing instrument to advertise a brand, strong arguments are needed. We offer you three of them:

1. Made in Germany
2. Sustainability included
3. Germany's No. 1 for brand-name ballpoint pens

You will not find this combination with any other manufacturer. On the following pages we will demonstrate this in more detail, but we can tell you the outcome in advance: Brands need brand-name pens. The Schneider brand offers decisive advantages not only through the recognized quality of its products but also through its sustainability and location. See for yourself on the following pages.

Yours sincerely,

Christian Schneider

Made in Germany

german brand award 17 winner

With the German Brand Award, the German Design Council and the German Brand Institute award successful brands with a consistent brand management and sustainable brand communication. We are very happy about the award because we know: A strong brand notably improves the value of the writing instruments without making them more expensive.

Headquarter in the Black Forest

Schneider employees come to work by bicycle

Our chemists developing new inks

Made in Germany: With Schneider you get writing instruments with a »built-in quality seal«. Due to the manufacturing process and careful controls, our products meet the expectations of German quality products: excellent writing characteristics, reliability and longevity. The good quality of the pens is appreciated by its users and this appreciation is automatically transferred to the logo and the brand which is printed on the pen.

Made in Germany is also an expression of an attitude: It stands for the commitment not to outsource the production to low wage countries. More and more companies and public authorities pay more attention to ethical aspects such as social responsibility and fair working conditions.

Sustainability included

Recycling of product components

Electricity is 100% from waterpower / regenerative energy

Reducing CO_2 emissions

Developed and produced in Germany

Reduction of emissions and waste

Long lasting, sustainable products

We Care

We Care

We don't just say that we care, but we also care in our hearts. Maybe it is because we feel our roots in the Black Forest and Harz that we have a distinct appreciation of nature and its beauty, and for the need to preserve it for generations to come. Everything we do is based on this fundamental attitude.

Sustainability included: Becoming increasingly important is a responsible attitude towards the environment.

Schneider has optimized all processes and is the first company in the sector since 1998 to be certified by EMAS. The regularly conducted validation of the environmental declaration provides proof of a continuous improvement process (CIP) in environmental performance in all production facilities. The environmental performance and policies are published in an environmental declaration available to the public.

The Schneider brand stands for continuous focus on sustainability. This includes the reduction in emissions and waste, recycling, the usage of electricity 100% from regenerative energies etc. in all subsidiaries. Our corporate carbon footprint includes the emissions caused, for example, by purchased raw materials and transport. In addition, we are increasingly offering products with specific ecological characteristics: ballpoint pens and fineliners with pen bodies made of bio-based material or climate neutral writing instruments. To reach climate neutrality Schneider offsets the exact amount of CO_2 emissions by supporting a recognised climate protection project.

PSI SUSTAINABILITY AWARDS
2017
Overall winner
Sustainable Company of the Year 2017

Germany's

No. 1

for
brand-name ballpoint pens

Germany's No. 1 for brand-name ballpoint pens:
Schneider is not just a pioneer but also the leading manufacturer of brand-name ballpoint pens in Germany. Eight Schneider models make up the GfK top ten brand-name pens list! The Schneider brand is therefore well-established with consumers. This is particularly important and an immediate advantage when it comes to promotional pens, because from a consumer perspective promotional pens are often perceived as cheap no-name products.

Pen Configurator

The Schneider Pen Configurator allows you to individualise, print and engrave your pens.

Did you know?
The Pen Configurator is the perfect easy-to-use online tool for adapting Schneider writing instruments to your own particular needs. What model, what colour, what imprint? These questions are answered on a step-by-step basis, so that, finally, a request can be sent with the picture of the required writing instrument.

First choose the model you want and then change the colour of the various components to meet your personal preferences. The printing surfaces indicated can now be filled with the message of your choice or with your logo, giving you a precise impression of what your finished writing instruments might look like. The picture is like a 3D image and the product can be turned on its axis so that you can see all the printed surfaces. Information like the product name, refill type and minimum order quantity for special colours are also displayed. The program is easy to use and is the perfect tool for developing ideas.

Design your personal writing instrument now at:
www.penconfigurator.com

Gift sets

Decisive: first impressions count. The content and the external packaging are of uttermost importance to Schneider. The presentations of the boxes are therefore immaculate, add value and exude quality. Depending on the selection, Schneider Schreibgeräte adds the appropriate exclusive frame, a smart and surprising moment, it dots the i's and cross the t's. Of course this then creates a platform for the presentation of your name and logo.

For further information please contact us any time.

Refills for ballpoint pens

"The good Schneider refill" has been a synonym for ballpoint pen refills and is readily available in specialist stores everywhere. Most Schneider refills are fitted with wear-resistant stainless steel tips. It guarantees that the large ink reserve can be used without leaving any residue and without any smear marks. Virtually all the promotional ballpoint pens can be optionally fitted with the following refills. The refills with Viscoglide® technology ensure exceptionally easy, gliding writing.

1 2 3 4 5 6 7 8 9

Description		Name		ISO-format	Tube	Tip	Available ink colours
Ballpoint ink-Refills with conus tip meeting ISO 12757-2 for Documents	M	1	**Express 735**	G2	Giant metal	Stainless steel	
		2	**Express 739**	G2	Giant plastic	Stainless steel	
		3	**Express 775**	H	Metal	Stainless steel	
		4	**774**	H	Plastic	Stainless steel	
		5	**770**	H	Plastic	Brass	
Viscoglide®-Refills with conus tip meeting ISO 12757-2 for Documents (excepting red ink colour)	M	6	**Slider 755**	G2	Giant metal	Stainless steel

		7	**Slider 710**	H	Metal	Stainless steel	
		8	**778**	H	Plastic	Stainless steel	
Gel ink-Refill with conus tip meeting ISO 27668-2 for Documents (excepting red + green ink colour)	M	9	**Gelion 39**	G2	Giant plastic	Stainless steel	

Technical data
Artwork

In order to perfectly create your imprint motifs and logos in accordance with your concepts on the selected promotional pens we need you to submit best quality artwork. In order to minimise your preparations we offer the following guidelines. There are three ways to submit your artwork:

1. Digital Data

The best alternative in the submission of artwork is to send it in the form of data or graphical data. Basically two categories exist within digital graphics:

Vector Graphics
In vector graphics the individual stet of a graphic is built up from the basic elements such as curves, lines and then saved in the form of coordinates and mathematical vectors. This has the big advantage that the corresponding graphics enlarge or reduce without steps and without loss of quality. Additionally vector graphics need a lot less data volume compared to bitmaps.

Some of the more popular vector graphic programs are CorelDraw (.cdr) and Adobe Illustrator (.ai). These programs as well as EPS or PDF graphics give the best results.
Warning: Please note that the original bitmap files that are saved or placed in vector-programs are not vector-graphics and are therefore not suitable to produce final films!

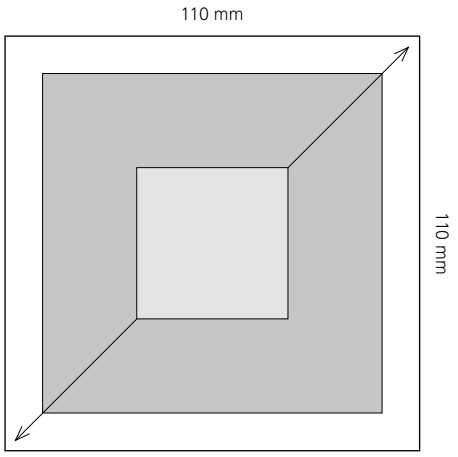
Bitmaps
The picture information is saved point by point. The disadvantage of bitmaps is that picture enlargements and reductions will result in considerable loss of quality. Artwork in bitmap format can be used, but it should have a resolution of a minimum of 1,200 dpi in reference to the original print size.

The most famous bitmap programs are TIFF, PSD and JPG. Internet graphics (e.g. gif) are not suitable for reproduction of artwork because they usually do not have sufficient resolution for printing.
Warning: Bitmap graphics which are saved or placed in Word, PowerPoint or Excel are not suitable!

2. Films

The classic form of the artwork for your imprint motif is a screen or offset-film. It must have the size of 1:1. For multiple colour prints please provide register marks for each film layer in order to fit the colours together. Offset films should not be cut too short. The optimum dimension is 110 x 110 mm, within which the logo is positioned regardless of size.

As we do not know in advance whether or not you need silk-screen or tampon films, electronic data is always advantageous and saves further delays.



3. Reproducible Artwork

For producing the process films we need your best quality reproducible artwork, e.g. clear hard copy, good drawings, crisp prints etc. – and please, not too small!
Please note that fax and photocopies can't be used.

Using Fonts in Digital Data

If you use fonts in your digital artwork, we kindly ask you to convert them to curves/vectors or to send the fonts as separate data (True-Type, Open-Type or Type1 Fonts).

In order to receive the best quality of legibility and imprint we recommend a font from 5 dots.

Stroke Widths

The minimum stroke width for imprinting is 0.15 mm. We cannot imprint thinner stroke widths because of technical conditions.

Imprinting Colours

Please indicate the required imprinting colours in Pantone or HKS. If we only can use a printed model we try to meet the colours to 100%, but without guarantee.

For imprints on coloured bodies we recommend the preimprint of a white field in order to receive a better covering of the following imprinting colours. Without this pre-imprint colours can differ from the requirement.

Possibilities for Transmission

You can send us your imprinting data via E-mail or on CD/ DVD. If you wish to send us your files via E-mail please attach the data to your E-mail-client as an enclosure and indicate in your E-mail the program in which you have established the data. Together with all the other relevant information please send your E-mails to: viw@schneiderpen.de

Imprint positions

D1	on the front part
D2	on the upper part
D3	on the barrel
D4	on the clip
D5	on the outer sleeve, on the left + right side of the clip
D6	in front of the clip
D7	above the clip
D8	on the inner sleeve, on the left + right side of the clip
D9	on the front side of the barrel
D10	on the reverse
D11	above, at the side of the clip
D12	on the back side of the barrel
D13	on the back side of the cap
D14	on the cap, on the left side of the clip
D15	on the cap, on the right side of the clip
D18	on the cover plate
D19	on the outside wrap
F1	film transfer on the barrel
F2	film transfer on the upper part
G1	laser engraving on the clip

Signs and Symbols

Cap-off
Can be kept open for 2 to 3 days without drying up.

For Documents
The writing is permanent according to ISO standards for “documentary use“.

Water and light resistant
The writing doesn’t dissolve in water and remains visible after UV radiation.

Triangular shape
Defines exact position for each finger.

Stylus-pen
With soft touch tip to operate on tablets and smartphones.

CO_2 neutral
Schneider offsets unavoidable emissions caused by supporting a certified and ecologically sustainable climate protection project.

Further information can be found at Climatepartner.com

Bio
Pen body with this symbol are made of biobased plastic.

Colour descriptions

Below please find a list of the colours for the plastic parts used in the catalogue. They all are adjusted to a Pantone colour tone. These colour details are only approximate. They can differ from the original plastic colours. To avoid these discrepancies please order a sample in the required colour

Black 10	Silver 11	Pantone Cool Gray 6 12	Pantone Cool Gray 11 13	Pantone 432 14	Pantone Cool Gray 1 15	Pantone 179 21
Pantone 187 24	Pantone 186 25	Pantone 296 27	Pantone 7694 30	Pantone 7687 31	Pantone 2756 32	Pantone 297 33
Pantone 293 34	Pantone 662 35	Pantone 311 36	Pantone 7468 37	Pantone 298 38	Pantone 315 39	Pantone 342 40

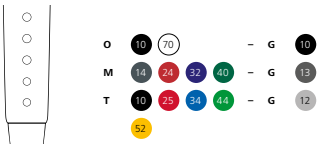
Plastic types

G Rubberised
L Lacquered
M Metallic
O Opaque
T Transparent

Colour key

For each writing instrument you will find every available plastic type and plastic colour. They are to be read as follows:



Front part available in **T like transparent** – colour **25** (Pantone 186)
with **rubberised grip section** – colour **12** (Pantone Cool Gray 6)

Please note that the illustrated product colours shown throughout this catalogue may vary slightly from actual products due to inherent limitations in reproduction techniques.
